PROFILE

Enthusiastic and detail-oriented Front-End Developer with a strong foundation in HTML5, CSS3, JavaScript, and React. Experienced in building responsive, user-friendly websites through academic projects and personal work. Passionate about creating clean, efficient code and optimizing user experience. Eager to apply my skills and grow in a collaborative development team.

MY PROJECTS

- Food Restaurant (HTML): A simple, responsive website showcasing a food restaurant's menu and services.
- Blog (HTML/CSS Grid): A clean, grid-based blog layout designed with HTML and CSS for responsive content display.
- One Page Website (HTML/CSS/Bootstrap): A fully responsive, single-page website design using HTML, CSS, and Bootstrap for a sleek UI.
- Calculator (React JS): A functional calculator built with React, featuring basic arithmetic operations.
- Tic Tac Toe Game (React JS): An interactive Tic Tac Toe game developed in React with real-time play and score tracking.
- Weather Forecast (React JS): A weather app in React that fetches and displays current weather data based on user location.
- Landing Page (React JS): A visually appealing, responsive landing page built with React for marketing or product promotion.
- E-commerce Website (React JS): A fully functional e-commerce frontend in React, featuring product listings, cart functionality, and checkout.
